

HORIZONTAL AXIS CONTINUOUS CENTRIFUGES Type EC

EC 06

KEYS FEATURES OF EC CENTRIFUGES

EASE OF USE AND INSTALLATION

- Machine to be installed on a ground or mezzanine floor.
- Hinged casing for full opening and easy access to the basket.
- Separated feeding and washing pipes and outlets.
- Vibrator on casing for easier solid discharge.

PRODUCTIVITY

- Scroll type centrifuge.
- Continuous running particularly suitable for most continuous chemical processing lines.
- Wide application range:
 - G effect from 2000 to 2500.
 - Temperature from 0 to 200° C.
 - Solid particle size from 50 microns.
- High output up to 10 tons/hour.

RELIABILITY

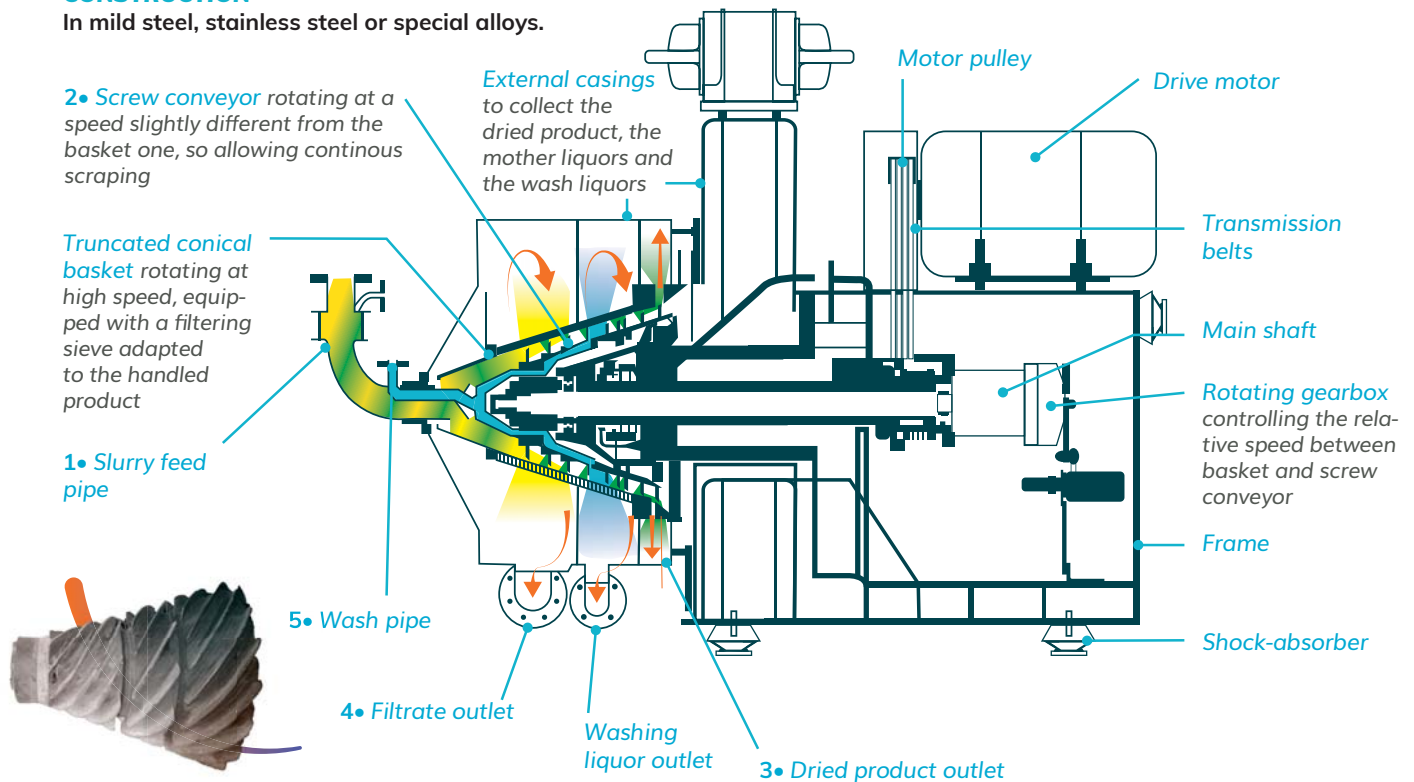

- Minimum vibration transmission due to centrifuge mass and heavy-duty antivibration pads.
- Torque limitation between basket and screw.

GENERAL DESIGN OF EC TYPE CENTRIFUGES

ROUSSELET ROBATEL continuous centrifugal dehydrators are centrifuges designed with a filtering basket. They assure the separation, the eventual washing and the drying of a solid phase suspended into a liquid phase.

CONSTRUCTION

In mild steel, stainless steel or special alloys.

OPERATION:

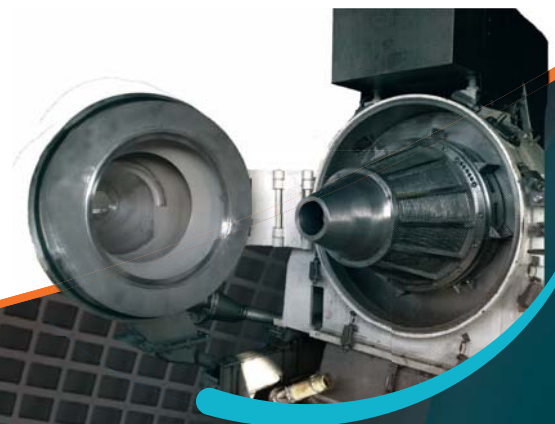

- The slurry to be processed is fed by gravity or by pump through feed pipe¹.
- Due to centrifugal force, the solid product is thrown against the inner wall of the basket.
- It is then continuously discharged by the screw conveyor² and discharged through outlet³.

- The filtrate liquid is discharged through outlet⁴.
- The wash pipe⁵ allows washing liquids to rinse solids prior to final spinning and discharging.

TECHNICAL CHARACTERISTICS OF EC CENTRIFUGES

	Standard Data						
TYPE	∅ mm	Max speed rpm	Centrifugal Force «G»	L cm	l cm	h cm	Weight kg
EC 03	300	3600	2560	170	130	150	1000
EC 04	400	2900	2250	210	150	175	2400
EC 06	600	2300	2300	250	200	190	4500
